

It is my freedom of choice to use XM radio with all the choices to pick from you can not get this on regular radio. The variety is great and if I choice to subscribe to this radio you should not be able to take this away from me. I people choice to listen to regular radio that is their choice. But if I dont have XM radio them I would just be listening to CD's and tapes in my vehicle not the regular radio for which the variety in my area lacks big time.
